Mr. Gene Hall
MDNR
Box 30028
Lansing, MI 48909

Dear Gene,

Enclosed is the draft Statement of Work (SOW) for the RI/FS at the Albion-Sheridan Township Landfill site. I have deviated somewhat from the current Region V model, especially under Task 2 -- Field Investigations, with the intention of making the SOW more clear and concise. Please review this document and let me know if you have any questions or comments.

We hope to go out with Special Notice letters at the beginning of April, which will include this SOW as an attachment. I would appreciate it if you could provide any comments by April 2, 1991.

Also, as I mentioned to you when you were in Chicago last week, we are looking for any information on Corning Glass and McGraw Edison: when they operated, the type of waste they produced, how it was disposed, etc. If you have the opportunity to check around the MDNR offices for any information, that would be really helpful. I think our civil investigator, Paul Rogers, is contacting some people in other divisions at MDNR; if he is successful or could use some more inside help, I will let you know.

Thanks for your assistance; I'll be looking forward to hearing from you in the future. Please call me at (312)353-7556 if you have any questions.

Sincerely,

Mary Beth Novy
